## 40 YEARS LOOKING FORWARD

Being part of Arco Valves group provides Sonia 40 years of industrial know-how DNA.

From design, selection of raw materials, manufacturing, packaging, logistics, after sales service. At Sonia, every step is key.

And today more than ever our commitment with the environment and social context.

Sonia is about passion, effort and the goal of being better.

## 40 AÑOS MIRANDO AL FUTURO

Haber nacido dentro del grupo industrial Válvulas Arco, nos permite hablar de más de 40 años de experiencia.

El diseño, la selección de materiales, la fabricación, el transporte, el servicio post-venta... para Sonia cada paso es relevante.

Hoy, más que nunca, tenemos un sólido compromiso con la desigualdad social, el apoyo a la cultura y el respeto por el medio ambiente.

No dejamos de aprender. La historia de Sonia se basa en el esfuerzo, tratar siempre de alcanzar la excelencia, conseguir el éxito y proporcionar la mejor respuesta al mercado.

# MAINTENANCE

## Care & Maintenance Bathroom Accessories

Sonia Accessories are known and admired for the long lasting quality and intense gloss in their finish.

In order to maintain your Sonia accessories with its brand new luster, it is important to follow some simple instructions:

- Use only neutral non-abrasive detergents.
- It is recommended to use a soft cloth, do not use abrasive cleaners, steel wool or pads.
- Do not spray cleaning agents directly on the accessories under any circumstance, spray on the cloth, since spray liquid can come into openings or holes of the products and cause damages.
- The use of steam cleaners is not recommended since the extreme high temperature of steam can compromise the integrity of the coating finish of the product.

## Furniture Maintenance

### GENERAL INFORMATION FOR ALL SURFACES:

The beauty and the life of our wood finish products will endure for years depending on the care they receive.

Sonia furniture is manufactured using materials ideal for use in an often-humid bathroom environment. Nevertheless, in bath design, it is always important to ensure the furniture is placed at a clear distance from your bath or shower to avoid continuous direct splashes of water and soap residue. When splashed with water, wipe furniture dry on order to minimize the risk of damage.

### Cleaning instructions:

- We recommend cleaning with a soft damp cloth and a mild all-purpose cleaning agent. (Spray the cleaning agent on to a damp cloth and wipe the surface. Never spray directly onto the furniture).
- We advise against vigorous rubbing as this may cause stains and damage.
- It is very important to keep the cabinet surfaces dry. Wipe up spills immediately using a dry cloth with a "blotting" motion, rather than wiping the spill from the cabinet surface. Pay special attention to areas where water is common, such as the sink and dishwasher, and do not allow water and detergents to dry on the cabinet surface.
- Wipe with a damp cloth wrung in clean water to remove the cleaning agent and to avoid stains and stripes.

- Avoid using dry cloths and paper tissue for furniture with matt and high-gloss surfaces, as these may scratch the surface.

- Do not use abrasive cleaning agents or cleaning agents that contain ammonia, bleach or other strong solvents as these will damage the furniture.

- Avoid excessive moisture. This is one of the worst enemies of any finish. Avoid draping wet towels over cabinet doors. Do not attach towel racks to door interiors. Immediately dry off any areas where water has spilled.

- Avoid excessive heat. Avoid placing cabinet appliances where the heat is directed onto cabinet surfaces. The stability of the wood and finish can be negatively impacted.

### Final thoughts

Wood products and their finish are only as good as the care they receive. Proper care as recommended will extend the life and beauty of your cabinet. Remember, leaving water or other moisture on the cabinet surface for extended periods of time will harm the finish.

# MANTENIMIENTO

## Mantenimiento accesorios baño

Los accesorios de Sonia son admirados por su calidad y brillo intenso que perdura a lo largo de la vida.

Para que tus accesorios conserven el brillo del primer día es importante seguir unas sencillas instrucciones de mantenimiento:

- Usar sólo detergentes neutros no abrasivos.
- Es recomendable utilizar un paño suave, no utilizar utensilios abrasivos, esponjas metálicas o estropajos.
- No conviene rociar agentes limpiadores en ningún caso sobre los accesorios, sino sobre el paño, cualquier líquido pulverizado puede entrar en aperturas o hendiduras de los productos y causar daños.
- La utilización de limpiadores a vapor no está permitida, las altas temperaturas pueden dañar los productos.

## Mantenimiento mobiliario

### INFORMACION GENERAL PARA TODAS LAS SUPERFICIES:

La belleza de los productos acabados en madera permanecerá intacta durante años si les damos los cuidados adecuados.

La selección de materiales para los cuartos de baño de Sonia la hacemos cuidadosamente con los materiales adecuados para el uso en ambientes húmedos. Es conveniente, sin embargo, asegurarnos de que en su instalación guardamos una distancia de seguridad prudencial con la ducha o bañera para evitar salpicaduras directas o residuos de jabón, y en caso de que se produzcan proceder a secar el mueble para minimizar posibles daños.

### Instrucciones de limpieza:

- Recomendamos limpiar su mueble con un paño suave y un limpiador multiusos no abrasivo. (Coloque el agente limpiador directamente en el paño y limpie entonces la superficie, por favor no dirija el pulverizador directamente hacia el mueble).
- Frótelo suavemente, el hacerlo

vigorosamente podría causar manchas o daños.

- Es muy importante mantener las superficies del mueble secas, le recomendamos poner atención en las zonas donde el agua es habitual, como zonas próximas al lavamanos, y secar con un paño los excesos de agua o jabones.

- En muebles con brillo le recomendamos no utilizar toallas de papel o paños secos que podrían rallar la superficie.

- No utilizar agentes abrasivos que contengan amoníaco, lejía o disolventes que puedan dañar la Madera.

- Los excesos de agua son los peores enemigos de la madera, evite limpiarlos por dentro o fuera con ninguna fuente directa de agua, y recordar siempre secar los excesos.

- Evite fuentes de calor directas, tipo limpiadores de vapor, hacia las superficies de su mueble.

Recuerde, el agua o cualquier líquido estancado en la superficie de su mueble dañaría el acabado y no estaría cubierto por ninguna garantía.

# TRANSPORT GUARRANTIES

At Sonia we have a real passion for quality that is why we apply strict guidelines for each and every process, starting from the entry of the materials into our warehouses, all the way through to the shipment of the correctly packed goods. That way we can guarantee that our clients can continue to enjoy the beauty and quality of our products.

To facilitate this there is a time period, during the transport of the goods, where we will need your close collaboration in order to ensure the maximum quality of the products.

We expect you to examine the materials once you have received them in order to make sure that it was delivered to you in perfect condition, because we provide up to 48 hours to make a claim in case of damages:

1. If you are absolutely sure that the material was delivered in perfect condition, please sign the delivery note without any further remarks.
2. In the case of any issues, or if you are not able to properly examine the goods then please add the following text in the delivery note: "Damaged packaging".
3. In case of damage to the materials themselves, the delivery note should be marked with the text "Damaged goods".

By performing these easy steps, the transport agencies and the insurance companies will be able to respond quickly and effectively for any damage caused during transport, if not Sonia SA will not be held responsible for any replacement cost.
